Work History

2020-05 -
Current

Front End Developer

Dark Matter Consulting, Remote Contract Work

- Converted Adobe XD designs into web pages using HTML, CSS, Sass, and Bootstrap.
- Pinpointed user experience issues to devise targeted suggestions for creating cohesive user experience.
- Developed designs in Adobe XD to meet specific requirements.
- Collaborated with in-house web designers to create sleek and innovative UI designs.
- Collaborate and communicate with remote team members using Git and GitHub.

2020-04 -
Current

Front End Developer

Open Eugene, Eugene, OR

- Collaborate and communicate with remote team members using GIT to complete development of mobile friendly UI / UX style-sheets for COVID recovery websites that make it easy for people to find resources online.
- Using SASS I created modular CSS components that allow for maintainable and scalable code.
- Wrote custom HTML and SASS using BEM Methodologies and 7-1 File Architecture.

2020-09 -
2020-09

National Day of Civic Hacking

Open Seattle, Code For PDX, DemocracyLab, Remote Hackathon, Littlehelpbook.com

- Completed full redesigns of existing website front end to improve navigation and enhance visuals.
- Collaborated with remote team members to efficiently complete a sprint within the given hours of the hackathon.

2020-11 -
2020-11

Hack to Give Thanks 2020

DemocracyLab, Code For PDX, Open Eugene, Remote Hackathon, Firerefuge.com

- Completely designed and developed the front end of a 3 page website used to help wildfire evacuees find resources in their area.
- Embedded an 'Esri' map that displays locations of people who have their homes open to wildfire evacuees as well as locations of evacuees in need of help from their community.
